

THE STATESMAN KOLKATA THURSDAY 3 DECEMBER 2009

*Prof. Herald Zur Hausen, who discovered the Human Papilloma Virus, speaking at a Press conference organised by Cancer Foundation on Wednesday morning. He said that the Union ministry of health and family welfare should incorporate the cervical cancer screening programme in the National Cancer Control Programme. As cervical cancer is the second most common cancer, after breast cancer, it is important to ensure vaccination. He also emphasised the need for manufacture of low cost vaccines so that it could be affordable to masses. According to the latest data of the Union health ministry, more than 73,000 women die of cervical cancer every year while 1,13,000 women are suffering from cervical cancer in India. || SNS*
